AVAILABLE SIZES: 8.5m² / 10.5m² / 12.5m² (7.0m² & 14.5m² coming soon)

This year the Flexifoil ION takes the bloodline to new levels of refinement in construction and aerofoil precision. Lap seams on the canopy allow for a more fluid, curved panel cut. A new Leading Edge closure seam has surpassed previous inflation pressure test results by 40% and new quality assurance techniques have improved the accuracy and right-first-time rate of manufacturing.

A unique kevlar-neoprene laminate sets a new standard in Leading Edge protection, covering every Leading Edge circumferential seam and wear point. The ION is built to withstand whatever you can throw at it and won't hold back your progression through fear of equipment failure.

The original ION launched in 2006 set the standard for the hybrid balance of C-kite performance and High Depower kite usability, with proportions since followed by many other brands. The latest offering still retains that balance of feel and usability in a kite that will let you push your freestyle, freeride or waveriding skills without limitation.
